WHEN YOUR RELAY SOLENOID NEED TO BE REPLACED

1. A Car That Fails To Start

Switch on other car accessories or devices that use the battery If the battery is confirmed not to be dead, the starter may need repair or total replacement

2. A Series Of Rapid Clicks From The Starter Relay

A possible cause of this problem could be insufficient conductivity due to contacts burning out or worn out leads that minimize the amount of the current flowing

3. The Starter Relay That Remains On, Even After The Engine Has Started

If this doesn't happen and the starter relay remains on even long after the engine has started, the relay is faulty

4. Occasional And Irregular Fails With Engine Starting
